Academic Development and Support Program

To help foster diversification of career paths for GPs, and to assist in providing education to the increasing number of future registrars, GPET has expanded its support to registrars to undertake academic posts in teaching and research. Five new academic posts will be established, bringing the total to 15. A workshop will also be provided to specifically support academic registrars. It is hoped this initiative will encourage registrars to consider undertaking future roles as GP supervisors or medical educators. RTPs are also funded to provide academic support to GP supervisors. Contact your RTP if you are interested in gaining further skills in education or research. For further information please contact [Dr Jane Cook](#).
