1 Overarching Principles of the 2017 AGPT Program Policies

- 1.1 The Australian General Practice Training (AGPT) Program policies have been informed by ongoing consultation with stakeholders. The revised policies aim to support Regional Training Organisations (RTOs) and registrars training on the AGPT Program.
- 1.2 The 2017 AGPT Program policies apply to all registrars enrolled on the AGPT Program.
 - 1.2.1 Allowances approved under the previous AGPT Program policies (including leave or extensions of training time) will be honoured under the 2017 AGPT Program policies. A record with the date of approval will need to be retained on file by the RTO.
- 1.3 The AGPT Program policies should be considered as an entire suite of policies, with no one policy superseding or negating the requirements of any other.
- 1.4 All Training Regions of the AGPT Program will be considered to be separate regions, regardless of the RTO responsible for the management of registrar training across the Training Regions.
- 1.5 It is expected that registrars will remain in the Training Region in which they accepted a training place for the duration of their training (transfers are permitted in certain circumstances as specified in the *AGPT Transfer Policy 2017*).
- 1.6 For registrars commencing training following selection onto the AGPT Program, they are required to hold general medical registration without conditions or undertakings in Australia by the commencement of the 2017 training year (6 February 2017).
 - 1.6.1 It should be noted that training on the AGPT Program begins in January or February each year with the specific start dates determined by the individual RTOs in each Training Region.
- 1.7 The policies seek to ensure that a minimum of 50% of registrar training occurs in an Australian Standard Geographical Classification – Remoteness Areas (ASGC–RA) 2-5 location, in line with the Government’s commitment to ensure that communities across all areas of Australia, including rural and regional locations, are receiving services from registrar training.
- 1.8 RTOs must develop and publish local policies that complement the AGPT Program policies. These local policies must be made accessible to all registrars within the RTO’s Training Region.
- 1.9 RTOs must manage individual registrar’s training and progress through training as per the 2017 AGPT Program policies.
- 1.10 It is expected that in instances where the Department of Health requests an RTO to take over the management of a registrar’s training from another RTO, that all efforts will be made to comply with the Department of Health’s request.

2 Objectives for the AGPT Program Policies

- 2.1 Contribute to the provision of high quality GP training across Australia.
- 2.2 GP registrars are well-distributed, with a minimum of 50% of training occurring in ASGC RA 2-5 locations.
- 2.3 GP training is delivered efficiently, with registrars progressing through the training program within the set timeframes ensuring continuity of training and recency of practice.
- 2.4 Doctors entering the Program are selected through a merit-based, transparent and equitable selection process.
- 2.5 Provide registrars with complaints and appeals processes.
- 2.6 Registrars are treated equitably during their general practice training.
- 2.7 Support registrars to undertake training in Aboriginal and Torres Strait Islander health settings, within the parameters set by the Department of Health.
